# mixed conditionals

## ЩО TAKE MIXED CONDITIONALS

**Mixed conditionals** — це умовні речення, у яких *час в умові (if-clause)* і *час у результаті* різні. Вони поєднують логіку **2nd** і **3rd conditional**.

## ОСНОВНІ ТИПИ

⏳ **Минуле → теперішнє (причина в минулому, результат зараз):** **If I had studied, I would speak better now.**

⏳ **Теперішнє → минуле (постійна риса, наслідок у минулому):** **If I were taller, I would have become a pilot.**

Подумай: *коли сталася причина?* і *коли бачимо результат?*

## СТРУКТУРИ

| ТИП | IF-CLAUSE | MAIN CLAUSE |
|---|---|---|
| Past → Present | if + Past Perfect | would + V (now / today) |
| Present → Past | if + Past Simple / were | would have + V3 |

**Now / today / at the moment** часто сигналізують результат у теперішньому.

## ПРИКЛАДИ

**If she had left earlier, she wouldn't be late now.**
Якби вона пішла раніше, зараз не запізнилася б.

**If I were more careful, I wouldn't have made that mistake.**
Якби я був уважнішим, не зробив би тієї помилки.

**If he hadn't missed the bus, he would be here now.**
Якби він не пропустив автобус, він був би тут зараз.

## ТИПОВІ ПОМИЛКИ

- ❌ Однакові часи в обох частинах → ❌ не mixed conditional
- ❌ *If I had studied, I would have a job now.* → ✅ **would have had** / або перебудувати речення
- ❌ Забувають, що *were* використовується для всіх осіб у нереальних умовах
